PRODUCT INFORMATION
Season Pass® Diamond is a high quality starter placed directly on or near the seed of your corn plant at a low volume rate. This provides more timely and hassle free plantings. It also delivers 100% available phosphorus that your corn needs to maximize yields.

FEATURES
- Clear liquid
- A highly pure, clean, true solution
- 100% orthophosphate with AVAIL technology
- Low-salt and non-corrosive formulation
- Designed for use in all liquid fertilizers and suspensions
- True N-P-K row starter
- Low application rate

BENEFITS
- Improves efficiency and yield potential
- Encourages fruit and seed formation
- Ability to lower moisture at harvest, reducing drying costs

FREQUENTLY ASKED QUESTIONS
Q: How much orthophosphate does Season Pass Diamond contain?
A: Season Pass Diamond is 100% orthophosphate fertilizer. This means all of the phosphorus is available to seedlings and root systems right away, even in cold and/or wet soil conditions.

Q: Can I mix liquid nitrogen with Season Pass Diamond to increase the nitrogen content?
A: No, do not add liquid nitrogen to Season Pass Diamond products or any product placed with the seed. The salt content will be too high and could damage the seed.

Q: What makes Season Pass Diamond so unique in the marketplace?
A: Season Pass Diamond has a blend of 100% orthophosphate, EDTA zinc, sulfur, and the phosphorus enhancing principles of AVAIL. With 5 gallons per acre on your corn, you will supply 10 pounds of protected phosphorus and 32 oz. of 9% EDTA chelated zinc.

Derived from: urea, ammonia, phosphoric acid, potassium hydroxide, ammonium thiocyanate, zinc EDTA

CAUTION: This fertilizer contains zinc and should be used only as recommended. It may prove harmful if mishandled.

It is not recommended for Season Pass products to be mixed with 20 lb or 52% nitrogen.

PRODUCT INFORMATION: Season Pass is a high-quality starter placed directly on the seed of your corn plant at a low volume rate with a non-corrugated material. This provides more timely and balanced tree plantings. It also delivers 100% available phosphorus that your corn needs to maintain yields at this critical stage. With five gallons of Season Pass, you will be placing 12 lbs of available phosphorus in a zone to feed the plant, maximizing corn yield.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual. Do not mix with other liquid fertilizers. Soil Application: Apply in forming, 2x, or in soil at planting. Do not apply directly on the seed in saline, alkali, or excess wetland soils. Fertilizer Application: Fill sand tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance test coverage and increase nutrient absorption.

RECOMMENDED RATES: The product should be used on the basis of a soil test or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and tissue analysis.

DANGER TOXIC IF SWALLOWED. MAY CAUSE SKIN IRRITATION. MAY CAUSE RESPIRATORY IRRITATION. Avoid contact with eyes, mouth, and skin. Washskin, clothing, and work and wash area with soap and water. Potentially hazardous if irritation persists. Wash contaminated clothing before re-use.

FIRST AID MEASURES:
- If inhaled, move victim to fresh air. Seek medical attention if irritation persists.
- If skin contacted with water, seek medical attention if irritation persists. Wash contaminated clothing before re-use.
- If in the eyes, immediately flush with water for at least 10 minutes. Seek medical attention if irritation persists.
- If swallowed, if victim is alert and not convulsing, give one glass of water to dilute material, but do not induce vomiting. Seek immediate medical attention.

THIS PRODUCT IS A.sqlite material and is not combustible. Safety glasses with side shields, goggles, or a face shield, long-sleeved shirt, rubber gloves, and local exhaust ventilation are recommended.

CONDITIONS OF SALE: Recommendations for use of this product are based upon factors believed to be reliable. However, because time, place, rate, application, weather, and other conditions of use are beyond the control of the manufacturer, no written or implied warranty is given for product performance. The Andersons warrants that this product meets the criteria outlined in its product specifications.

This UNIFORM NATIONAL CHEMICAL IDENTIFICATION SYSTEM (UNICID) number is used by all states to identify this chemical. It is used in all states and has been approved by the national association of state agricultural chemical regulatory agencies.

Do not allow to poison. Always test for compatibility.
