PRODUCT INFORMATION
Season Pass® Plus Diamond is a high quality starter placed directly on or near the seed of your corn plant at a low volume rate. This provides more timely and hassle free plantings. It also delivers 100% available phosphorus that your corn needs to maximize yields.

FEATURES
- Clear liquid
- A highly pure, clean, true solution
- 100% orthophosphate with AVAIL technology
- Low-salt and non-corrosive formulation
- Designed for use in all liquid fertilizers and suspensions
- True N-P-K row starter
- Low application rate

BENEFITS
- Improves efficiency and yield potential
- Encourages fruit and seed formation
- Ability to lower moisture at harvest, reducing drying costs

FREQUENTLY ASKED QUESTIONS
Q: How much orthophosphate does Season Pass Plus Diamond contain?
A: Season Pass Plus Diamond is 100% orthophosphate fertilizer. This means all of the phosphorus is available to seedlings and root systems right away, even in cold and/or wet soil conditions.

Q: Can I mix liquid nitrogen with Season Pass Plus Diamond to increase the nitrogen content?
A: No, do not add liquid nitrogen to Season Pass Plus Diamond products or any product placed with the seed. The salt content will be too high and could damage the seed.

Q: What makes Season Pass Plus Diamond so unique in the marketplace?
A: Season Pass Plus Diamond has a blend of 100% orthophosphate, EDTA zinc, sulfur, and the phosphorus enhancing principles of AVAIL. With 5 gallons per acre on your corn, you will supply 10 pounds of protected phosphorus and 32 oz. of 9% EDTA chelated zinc.

GUARANTEED ANALYSIS

Derived from: urea, ammonia, phosphoric acid, potassium hydroxide, ammonium thiosulfate, Zn EDTA.

CAUTION: This fertilizer contains zinc and should be used only as recommended. It may prove harmful if mishandled. It is not recommended for Season Pass products to be mixed with 20% or 40% urea.

PRODUCT INFORMATION: Season Pass® is a high quality starter placed directly on the seed of your corn plant at a low volume rate with a non-corrosive material. This provides more timely and has less plantings. It also delivers 100% available phosphorus that your corn needs to maintain yields by this critical stage. With five gallons of Season Pass, you will be placing 7.5 lbs. of available phosphorus in fertilizer to feed the plant, maximizing corn yield.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual or institution. Do not mix with other liquid fertilizers.

Soil Applications: Apply one foot, ½ or 1 gallon to 1000 square feet. Do not apply directly on the soil in saline, alkali, or coarse textured soils.

Foliar Applications: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Follow applications may be beneficial. Use any as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture or during periods of high temperatures. Use of a surfactant may enhance test coverage and increase nutrient absorption.

RECOMMENDED RATE: This product should be applied in the absence of soil and/or tissue analysis. Suggested application rates are for one growing season (pounds per acre) in the absence of soil and/or tissue analysis.
